VHSource, LLC

E-Books

Welcome to a new category of assistance available from VHSource, LLC. Our first listings are research tools created long ago when Herbert was a much more integral part of American Musical History. VHSource, LLC's primary purpose is to return the Herbert body of work to that distinction. Our first offerings fall into the Herbert research category and will help you locate that character or song title or vague reference that floats through the mind and ear and match it up with the correct Herbert operetta. When a composer creates a huge number of compositions, especially 43 operettas from 10-20+ songs in each, it helps to have a quick reference.

In the future, our e-book offerings will continue to offer research assistance by pulling various sources together into easy to use as you plan your next Herbert project.
